

Betreff: Welcome to the Master „Biology – From Molecules to Organisms“ at University Osnabrueck

Dear new student,

Congratulations to being admitted to the **Master program “Biology – From Molecules to Organisms”** at University Osnabrueck. The Department Biology and all lectures & teaching staff warmly welcome you.

For the initial orientation at the department biology at the University Osnabrueck, please join the **introductory week for master students within the Introductory Module** ([Program - Introductory Week](#)) from Wednesday 1st April 2026 to Thursday 2nd April 2026 (Start 1st April 8:45 in [Building 35, Room 23-24, BarbarasträÙe 11 Osnabrueck](#)). The Dean of Studies, the student advisors and the study programme manager introduce the University of Osnabrück and the Department of Biology/Chemistry, and provide a basic introduction to the organisation of courses via StudIP. In addition, the procedure for electing Master's modules is presented. You will further get in touch with every working group of the department while the group leaders present their scientific focus as well as their offered courses in the Master program. After each presentation you will have the opportunity to ask questions. Following the presentation of the working groups, the Master's modules for the summer semester 2026 will be selected. The election takes place online, but is also supported on site and is organized by the study programme manager. You will receive all the necessary information in the Introductory Week!

If you do not want to miss any further information regarding your biology studies at the University Osnabrueck, please register for the StudIP event [“Important information for all biology students”](#). Furthermore, please also register in the StudIP event ["Introductory Module - Lecture with Symposium in the next WS \[BIO-EM-MASTER\] \(SoSe 2026\)"](#) to receive all information about the Introductory week. For both registrations you need your access data for the StudIP system, which you should have received after enrollment. If you still have problems using StudIP, the introduction to it in the Introductory Week will help you.

If you are already interested in which Master's modules will be offered and available for selection in the summer semester 2026, click [HERE](#) for more information.

Do not miss this unique opportunity to onboard and to ensure a smooth start into your Master studies!

As an international student, you can also take advantage of additional services offered by the International Office, which will help you settle in Germany and Osnabrück, click [HERE](#) for more information.

We are looking forward to welcoming you in Osnabrueck!

Regards,

Laura Elpers
