The »Career Tandem« offers advanced young scholars the opportunity to collaborate with experienced professors and leading specialists in academia, business, politics and society as they work and train for their academic career. The »Career Tandem« is based on a series of bespoke meetings which aim to advance participants’ career prospects inside and outside academia, to promote their professional networking and to reinforce their key skills.
The »Career Tandem« enables young scholars to:

■ **obtain one-on-one careers advice from their mentors**

The »Career Tandem« offers bespoke, one-on-one meetings with an experienced person from academia, business, politics or society with the aim of fine-tuning young scholars’ strategic career planning based on suggestions and ideas put forward by their mentor. The mentoring programme lasts one year.

■ **construct professional networks inside and outside academia**

By collaborating with their mentors, young scholars have the opportunity to expand their professional network.

### How Does it Work?

<table>
<thead>
<tr>
<th>Preparatory Phase (ZePrOs)</th>
<th>Mentoring Phase in the »Career Tandem«</th>
<th>Final Phase</th>
